Understanding Professional Forecaster

Professional Forecaster is a computer generated astrological report that lists and interprets transits. A transit occurs each time that the Sun, Moon or one of the planets in our solar system forms a precise alignment with another planet, or with a previous planetary position. The calculations produced by Professional Forecaster are extremely precise and state-of-the-art.

A type of transit that affects all of us is found under the menu item called “transit-to-transit.” In this category, the Moon moving into opposition (180 degrees or half a circle) to the Sun is a transit. This is commonly called the full Moon. Another example would be Mars moving into opposition to the Sun. Transits are formed when two planets align according to specific geometric rules. Alignments of planets that are 0, 60, 90, 120, and 180 degrees apart are important and produce noticeable effects. Other degree separations are also valid, though more subtle.

A more personal form of transit occurs when the Sun, Moon and planets align with the positions that they were in at the exact time and place of your birth. This kind of transit constitutes one of the most popular methods of forecasting in today’s astrology. An example would be the planet Saturn moving into the exact degree of the zodiac that the Sun was located in at the time of your birth. This transit only occurs every 29 years or so. Another example would be the Moon aligning 90 degrees from the position that Mars was in at your birth. This transit occurs every month.

You should know that professional astrologers normally employ several forecasting systems in their work, not just transits alone. Transits are generally used for close-up work in making a forecast—that is why Professional Forecaster uses this system. For a better grasp of long-range trends, other approaches are necessary. Therefore, please bear in mind that your report, which may be surprisingly accurate at times, may not clearly delineate everything that is happening to you.

Professional Forecaster lists the times that transits enter orb (become influential), when they are exact, and when they leave orb. The orb of influence of a planet depends on its rate of motion. When the planets Venus and Mercury, and also the Sun, are the transitors (listed as Trans. Venus, Trans. Sun, etc.) you are likely to feel the impact of the transit within several hours of its exact alignment, though the full effects may last the entire day. Transiting Mars has an effect that may be felt a day before and after its exact alignment. Transiting Jupiter, Saturn, Uranus, Neptune and Pluto, and the Moon’s Node (the point where the orbits of the Moon and Earth intersect) have effects that last as much as a week before and after the time that the alignment is exact.

When planets enter a house, they stimulate the issues of that house for the length of time they remain in it. For the Moon this is usually for the next two days. For Mercury the effect lasts about two weeks, for Venus three weeks, the Sun four weeks, and Mars five to six weeks. Jupiter remains in a house for about a year, and Saturn two to three years. Uranus, Neptune and Pluto remain in a house for anywhere from seven to fifteen years. If the birth time is very accurate, the effect of a planet entering a house will be very noticeable on the day it is listed.

The interpretations offered in Professional Forecaster are based on years of close observations. Since the effects of any particular transit differ widely for each individual, the delineations are necessarily generalized. They do, however, state the major themes of the transit and frequently offer some good advice. Sometimes several transits of contrasting natures occur at the same time. While the effect of the combination may not be predictable, the effects of each individual transit play a role in the situation. Because there are an infinite number of possible combinations, no attempt to write delineations for this kind of situation has been made. In general, the slower-moving transits have a longer effect and impact, and their influence will tend to override the minor transits.

There are many ways to make Professional Forecaster a useful tool. It is helpful for planning your schedule, whether this be for business or pleasure. Why schedule an important meeting on a day when the text suggests such events may be a source of problems? Used in such a way, Professional Forecaster can be a helpful organizer of your time.
